**Ingestion**

If this product is ingested, remove victim immediately from source of exposure. Rinse mouth thoroughly. Do not induce vomiting. Provide fresh air, warmth and rest, preferably in comfortable upright sitting position. Get medical attention immediately! Never give anything by mouth to an unconscious person.

**Skin Contact**

Immediately wash with water, preferably under a shower, removing contaminated clothing while washing proceeds. Obtain medical attention if irritation persists or if blistering occurs. Contaminated clothing should be washed before re-use.

**Eye Contact**

Do not rub eye. If this product contacts the eyes, gently flush eyes with water for at least fifteen (15) minutes, lifting the upper and lower eyelids occasionally. Avoid contaminating unaffected eye. Remove contact lenses if present and easy to do so. Seek medical attention.

### 4.2 Most Important Symptoms and Effects, Both Acute and Delayed

Treat symptomatically.

## SECTION 5: FIRE-FIGHTING MEASURES

### 5.1 Extinguishing Media

**Extinguishing Media**

Use fire-extinguishing media appropriate for surrounding materials: Powder dry chemicals, carbon dioxide, foam spray.

**Unsuitable Extinguishing Media**

High volume water jet.

### 5.2 Special Hazards Arising From the Substance or Mixture

**Hazardous Combustion Products**

During fire, gases hazardous to health may be formed.

**Unusual Fire & Explosion Hazards**

No unusual fire or explosion hazards noted.

**Specific Hazards**

If heated, harmful vapours may be formed. Floors may become slippery, avoid falls.

### 5.3 Advice for Firefighters

**Special Fire Fighting Procedures**

If possible, fight fire from protected position. Use powder, dry chemical, carbon dioxide etc.

**Protective Equipment for Firefighters**

for initial stage of fire. For a large scale fire, use foam to smother flames. Avoid breathing fire vapours. Ventilate closed spaces before entering them. Keep up-wind to avoid fumes. Containers close to fire should be removed immediately or cooled with water if safe to do so. Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

**6.3 Methods and Material for Containment and Cleaning Up**

**Spill Clean Up Methods**

Stop leak if possible without risk. DO NOT touch spilled material! Wear necessary protective equipment. Ventilate and evacuate the area. Eliminate all sources of ignition. Wear respirator if ventilation is not adequate.

Absorb spillage with non-combustible, absorbent material - sand. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container. In case of a large scale of spill, dyke area with sand to stop the spill spreading. Wash work area with water.

### Protective Equipment

### Engineering Measures

Facilities for handling this product should be closed system. Ensure surfaces and floors are made from non-permeable material. Provide adequate ventilation, including appropriate local extraction.

### Respiratory Equipment

Where risk assessment shows air-purifying respirators are appropriate a full face respirator conforming to EN143, and suitable respirator cartridges as a backup to engineering controls. If the respirator is the sole means of protection, use a full-face supplied air respirator. Use respirators and components tested and approved under appropriate government standards such as CEN (EU).

Change filters frequently. Use respiratory protection as specified by an industrial hygienist or other qualified professional if concentrations exceed the limits listed in Section 8. Type A/organic vapour protective components recommended.

### Hand Protection

Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374) is recommended. Gloves must be inspected prior to use. Suggested material: Nitrile/Chloroprene. Consult manufacturer for specific advice. Layer thickness:  $\geq 0.35$  mm.

Use proper glove removal technique (without touching glove's outer surface) to avoid skin contact with this product. Dispose of contaminated gloves after use in accordance with applicable laws and good laboratory practices. Change gloves regularly. Selection of the glove material depends on consideration of the penetration times, rates of diffusion and degradation, and concentration specific to the workplace.

### Eye Protection

Wear safety goggles or face shield to prevent any possibility of eye contact. Use equipment for eye protection tested and approved under appropriate government standards such as EN 166(EU).

### Other Protection

Wear appropriate clothing to prevent any possibility of skin contact. Suggested PPE: Fire/chemical resistant full-length overalls with electrically conductive safety shoes or grounding straps. Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist.

### Hygiene Measures

Observe normal hygiene standards. Keep container tightly closed. Do not eat, drink or smoke during work. Handle in accordance with good industrial hygiene and safety practice. Keep container tightly closed. Wash promptly if skin becomes wet or contaminated.

### Process Conditions
